

Read your analysis in three steps

One model reads the complete EuroJackpot record for the twelve Euro Numbers and gives you four ways of reading it. The page lays them out side by side, so you can **interpret the analytical outputs** with the full picture in front of you.

1

Press "Enter for Euro Numbers"

2

Read the five outputs

3

Interpret the analytical outputs

Science · Method · Evidence.

1

STEP 1

Press "Enter for Euro Numbers"

The latest official Euro Numbers and their draw date load by themselves in the **white box**. The button sits right under it. Your results appear in a few seconds, built from the full EuroJackpot record up to that draw.

Latest official Euro Numbers
Fri 25 Sep 2026

5

10

Enter for Euro Numbers

The latest official Euro Numbers, 5, 10, drawn on Fri 25 Sep 2026. Your results are calculated from the full record up to that draw.

2

STEP 2

Read the five outputs

Under the button, your run is laid out under **five labels**. These are the main outputs. The AI candidate pool comes first, and the four Top-2 views sit under it, each giving you a pair read in its own way. Every number is shown as the same white ball, and none of them is marked out by colour.

The run on the draw of Fri 25 Sep 2026. The pool holds 3, 4, 5, 6, 7, 8. In this run Standard Top-2 gives 4 and 6; A. Zone-diversified Top-2 gives 6 and 4; B. Direction-diversified Top-2 gives 4 and 3; C. Mu-band Top-2 gives 4 and 6.

 **Tap any number** and it lights up in every output, so you see at once where it belongs.

**AI candidate pool**
6/12
The candidate pool retained by the model for analytical comparison. The four views are drawn from it.

**Standard Top-2**
The direct reading: the two highest-scoring numbers, with no further constraint.

**A. Zone-diversified Top-2**
Spreads the pair across the low, middle and high bands of 1–12, so the two do not sit in the same part of the board.

**B. Direction-diversified Top-2**
Favours movement away from what just came up.

**C. Mu-band Top-2**
Combines ranking strength with a stabilisation layer, so the view stays coherent as new draws arrive.

3**STEP 3**

Interpret the analytical outputs

Each view already gives you a pair. A simple way to compare them is shown here with this run.

1

Start with the pool

The AI candidate pool holds the six Euro Numbers the model retains out of twelve. In this run: 3, 4, 5, 6, 7, 8.

2

Compare the four pairs

In this run Standard Top-2 gives 4 and 6; A. Zone-diversified Top-2 gives 6 and 4; B. Direction-diversified Top-2 gives 4 and 3; C. Mu-band Top-2 gives 4 and 6. Where the views differ, the four descriptions above explain why.

3

Check them against the pool

Every pair in this run sits inside the pool.

The outputs remain descriptive and are evaluated after the draw.

**AFTER THE DRAW**

Your runs, scored

My saved runs

Every run is saved automatically and privately, and your **five most recent** stay under **My saved runs**. Select one and it opens exactly as it was saved, in the same form as the live run. Once the next draw is published, its Euro Numbers appear under **Next draw** and **turn yellow** in every list. The figure beside each label, such as 1/2, shows how many of the drawn Euro Numbers that list held. **Hide result** shows the run exactly as it was before the draw. The raw output under it holds the same run as text, ready to copy.

4

The run built from 4, 5 and saved on 22 Sep 2026. The next draw, Fri 25 Sep 2026, was 5, 10. The AI candidate pool held one of them (5), shown in yellow.

Model performance

Each saved run is scored automatically against the draw that followed it. Yellow tiles are the Euro Numbers that came out, and the score sits top right of each output.

- Base draw · the draw your run was built from.
- Next draw · the draw that came out after it.
- Best output · the highest score among the scored outputs.

Results (Euro Numbers)

Premium

Built from 4, 5. The next draw was 5, 10. Best output: 1 of 2, held by AI candidate pool 6/12.

Across your saved runs puts every scored run in one table, and the last row adds them up. Select a row to open that run above. Your newest run joins the table once its next draw is published.

ACROSS YOUR SAVED RUNS

Every saved run of yours whose next draw has been published. Each row is one run: the draw it was built from, the draw it was scored against, and what the headline output held. Select a row to open that run above.

BASE DRAW	NEXT DRAW	AI CANDIDATE POOL	STANDARD	A. ZONE-DIVERSIFIED	B. DIRECTION-DIVERSIFIED	C. MU-BAND
4, 5	5, 10	1/2	0/2	0/2	0/2	0/2
4, 5	4, 5	0/2	0/2	0/2	0/2	0/2
1, 8	4, 5	0/2	0/2	0/2	0/2	0/2
1, 12	1, 8	0/2	0/2	0/2	0/2	0/2
4 RUNS	8 EURO NUMBERS DRAWN	1	0	0	0	0

One further run of yours, built from 5, 10, is waiting for its next draw. It joins the table once that draw is published.

Four scored runs, 8 Euro Numbers drawn in total. The AI candidate pool held 1, Standard 0, Zone-diversified 0, Direction-diversified 0 and Mu-band 0.

Just started? A run is scored once the draw after it is published, so the panel fills in one draw at a time.

Results (Euro Numbers)

Check a saved run against the pair that followed, number by number.

Track Record

The public walk-forward record, draw by draw, hits and misses alike, with nothing hidden.

Ready when you are
